

RADIOLOGY HEALTH EQUITY COALITION

Commit to Act

While disparities and inequities in healthcare have been evident for many years, the COVID-19 pandemic has magnified the disproportionate numbers of minorities and rural residents in the United States affected by barriers to care.

Did you know?

- Life expectancy is three years shorter, and heart disease, cancer and stroke death rates are significantly higher in rural areas (**23% of the U.S. population**) vs. metropolitan areas.
- U.S. Latinos are more likely to die from Colorectal Cancer (CRC) than those in many Central and South American nations. The CRC death rate for U.S. Latinos has **dropped more slowly** than for whites.
- **Black women are 42%** more likely to die from breast cancer than white women.
- Asian Americans are twice as likely to die from stomach cancers, eight times more likely to die from hepatitis and have a tuberculosis rate more than **30 times higher** than white Americans.

The Radiology Health Equity Coalition will deliver steps radiology professionals can take to drive improved outcomes for those impacted by regional, racial and economic-related healthcare disparities. Get started and Commit to Act now.

“Commit to act in advancing health equity in your practice and working to reduce health disparities in radiology.”

Coalition Members

The coalition members are represented by the following logos:

- ABR** | AMERICAN BOARD OF RADIOLOGY
- ACR** | AMERICAN COLLEGE OF RADIOLOGY
- AUR** | ASSOCIATION OF UNIVERSITY RADIOLOGISTS
- AMA** | SECTION COUNCIL ON RADIOLOGY
- WRS** | Wisconsin Radiological Society
- RSNA** | Radiological Society of North America
- SCARD** | Society of Chairs of Academic Radiology Departments
- Society of Interventional Radiology**
